EXPERIENCE

Women in Information & Computer Sciences at UCI, Irvine, CA

JANUARY 2016 - PRESENT

GRAPHIC DESIGNER AND MARKETING COMMITTEE MEMBER

- Designed and edited flyers which helped increase student interest and attendance at weekly events
- Worked directly with club presidents and committee chairs to design t-shirts for members and events
- Marketed events to computer science students every week using social media and email

CodeHS, San Francisco, CA

JANUARY 2016 - PRESENT

REMOTE COMPUTER SCIENCE TUTOR

- Guided students with Javascript questions and assignments with a student satisfaction rating of 4.3/5
- Evaluated and gave feedback on more than 1000 student assignments to help students learn
- Reported bugs and gave suggestions about the tutor grading system to help improve the website

PROJECTS

Fabflix

SPRING 2017

- Movie database website similar to IMDB. Built in a team of 3 using Java Servlets, JSP, Bootstrap framework, and backend server using MySQL to make advanced searches for movies in the database and display movie information.
- Hosted on own local machine with Apache Tomcat and as a web application on Amazon AWS.

SmileRun

SPRING 2017

- Web game implemented in Python, Javascript, HTML, and CSS using the Microsoft Emotion API to make a game that advanced based on facial expression recognition. Within the team of 4, personally worked on HTML and CSS.
- Built for the AthenaHacks 2017 all-female hackathon at USC and won the Organizer's Favorite award.
